Purely Business!

The columns of a newspaper represent a class of advertising "notices" free any more than a merchant can take advantage of the public by selling goods or shoes. A newspaper is a legitimate business concern, and it contains news stories, trade, and advertisements should be paid for, no matter in what part of the paper they appear.

General Lee's Notion.

Combining "Yankees" and "Rebels" in the
Brigades to Fight Spain.

General Fitzhugh Lee said that the plan
to form Regiments into Brigades for the
war with Spain would be to combine into
each Brigade both Northern and Southern
ers soldiers.

No single Brigade will be formed of
exclusive Regiments from either section.

General Lee will not say that he expects
the war to go to Cuba, but hints at this ar-
rangement.

He says the Virginia troops will all
fight under him.

Human beings have six muscles to
each eye that serve to move the eyes in
several directions. In the side of the
head, cows, sheep and other quadrupeds,
which habitually incline their heads to the earth in search of food, have
a muscle by which their eyelids are sus-
pended and supported, and which we do
not need.

sold hundreds of bottles of this remedy

that Chamberlain's is the most satisfac-

THE Hon. WILLIAM LINDSAY, United States Senator from Kentucky, has the Ledger's thanks for a copy of the President's Message transmitting to Congress the Report of the Naval Court of Inquiry upon the destruction of the Battle-ship Maine. GOLD continues to flow into the country at the rate of a million dollars a day, the engagements abroad for the United States from February 25th to April 10th having been in round numbers \$62,000,000. When to this is added the fact that the mines of this country are increasing their gold product very greatly this year, it will be seen that the United States is not likely to suffer for want of gold.

THE BUYERS' GUIDE.

Remember the Maine!

Place to get bargains in this section of the country is at John I. Winter's the Price Fighter, Maysville, Ky. Our good ship was blown up by a Spanish bomb, which has aroused the patriotic spirit of all Americans residing in the sunny land of the brave, shaded by the waving folds of Old Glory. Another explosion of interest was that of the high prices heretofore prevailing in this section. Remember the date—January the 3d, in the year of our Lord 1898—the Price Fighter opened in Maysville. Only three months since and "High Prices" have gone forever! Our good and magical sword—"Buy 'em right, add 10 per cent, sell 'em quick"—won the fight, and gratitude today fills the hearts of all the people. They all have a warm corner in their hearts for the Price Fighter, for he has already saved them thousands of dollars. Notice the happy, contented you that John I. Winter is the people's friend. We court an investigation of our open method of business. We have no leaders, no baits, no catches of any kind. We make 10 per cent. on everything that leaves our house. We guarantee everything, both in quality and price.

GET YOUR GUN

Maysville Wild Over the Declaration of War.

ALL YOUNG AMERICANS ON TAP.

The news flashed over the wires at noon yesterday that President McKinley had signed the resolutions of Congress and had notified Spain that she must quit Cuba within sixty hours, else the United States would move on her.

Hardly had the intelligence been bulletin in front of THE LEDGER office when the Neptune firebell began an incessant ringing.

This was followed soon by piercing shrieks of the whistles of C. and O. engines along Front street and from various factories throughout the city, the courthouse and church bells chiming in merrily.

Firerackers, big and little, were exploded in Fountain Place; flags were rapidly unfurled on every side, and all young Americans, black and white, rent the air with patriotic screams.

A fifi and drum corps was soon impressed, and if a recruiting station has been opened Maysville would have furnished the full complement for a company in less time than it takes to write these lines.

Not since the days of '61—if in fact even then—has there been such a spontaneous outburst of patriotic feeling.

But while all this was going on among the present generation, gray-headed men of that which is passing from the stage were solemn faces, for they all knew what war meant, with its long train of suffering and sorrow.

Each face bore a look of soberness, and while every one felt the gravity of the situation there was no mistaking the justice of our cause and a determination to wipe out the insults and injuries that Spain had inflicted upon our people.

"Remember the Maine" will be the battle-cry of the impending war and the shibboleth that will lead our arms to victory.

Miss Annie McAfee of Danville committed suicide at the St. Clair Hotel in Cincinnati by drinking carbolic acid.

The little friends of Miss Edna Wallace of East Sixth street were highly entertained last evening on the occasion of her 8th birthday. At 9 o'clock the little ones adjourned to the table, where they enjoyed all the delicacies of the season. The evening will long be remembered by those present.

Length of tow, 88 feet. Length over all, including steamboat, 1,008 feet.

The Joseph B. Williams is the largest and most powerful towboat on the Ohio and Mississippi rivers, and the tow she is now guiding and propelling down the Father of Waters is one-fourth larger than any she has ever handled before, says The Louisville Journal. After loading at Louisville the tow consisted of 32 coalboats, 4 barges, 3 flats and 1 boxboat. The size of a coalboat is 155 feet long, 26 feet wide and 10 feet deep, and contains 30,000 bushels of coal; the size of a barge is 135 feet in length, 26 feet wide, 8½ feet deep, and contains about 18,000

bushels of coal; a flat is 90 feet in length, 16 feet wide, 8 feet deep, and contains 7,000 bushels of coal; a boxboat is 90 feet long, 18 feet wide, 8½ feet deep, and contains 8,000 bushels of coal. The total amount of coal in the tow is 1,458,000 bushels.

To move the amount of coal that is in the Williams's tow would require 1,957 ordinary freight cars, which would stretch out a distance of over twelve miles on the railroad track. A better idea of the immensity of this great tow can be given by the statement that the vessel containing
